# Unit I

# Introduction to Computer Network

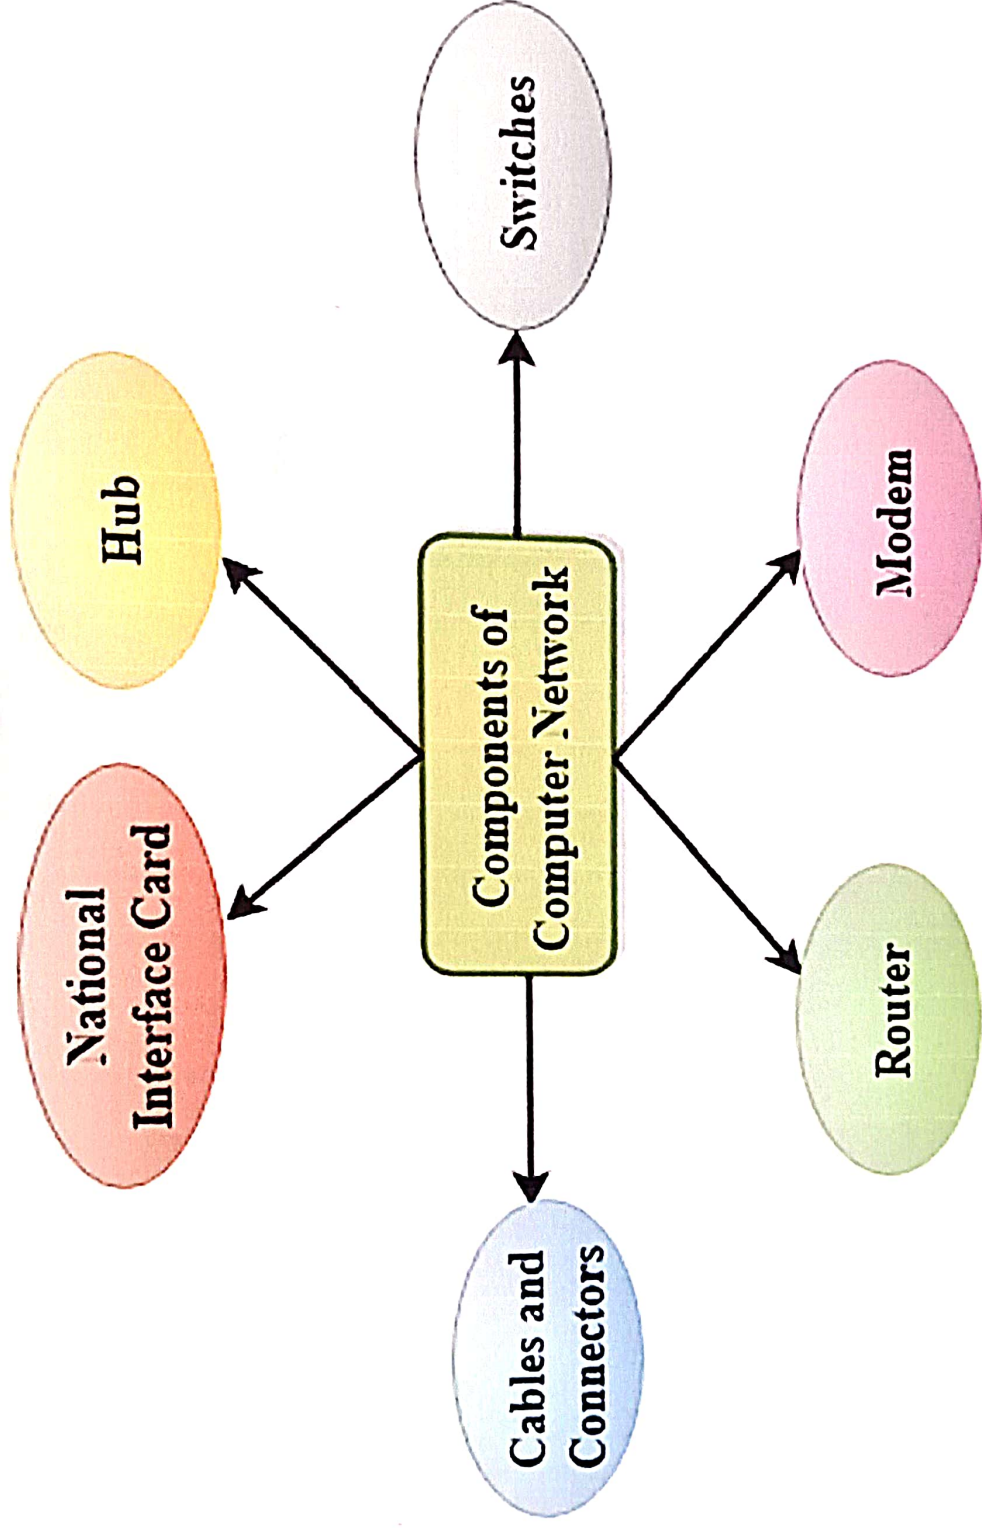

# What is Network

- A network consists of multiple devices that communicate with one another. It can be as small as two computers or as large as billions of devices. While a traditional network is comprised of desktop computer, modern networks may include laptop, tablets, smartphone, televisions, gaming consoles, smart appliances, and other electronics.

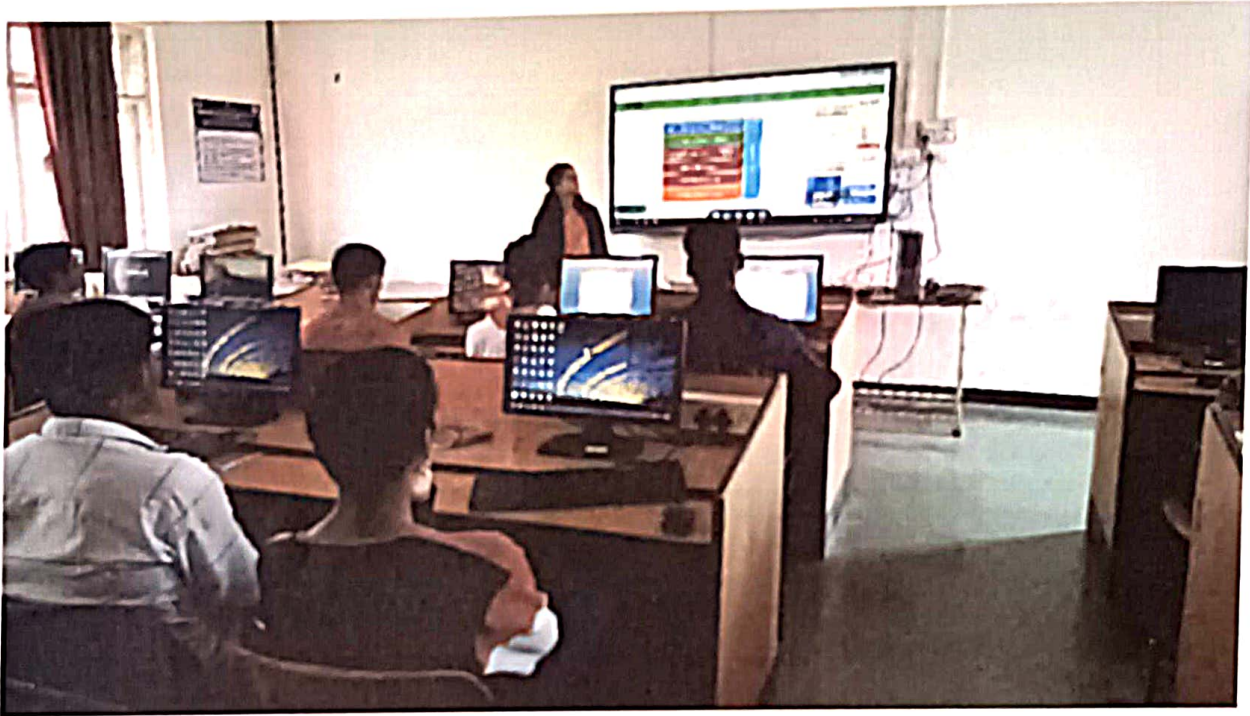

# Computer Components and Devices

- Computer networks consist of various components and devices that work together to enable communication and data sharing among computers and other devices.
